

ABHIJEET KUMAR SINGH

Senior Java Backend Developer

✉ abhijeetksinghdev@gmail.com ☎ +91 7739839779 📍 Noida, India 🔗 [abhijeet.singh](https://www.linkedin.com/in/abhijeet.singh) 🌐 [abhijeet.singh](https://github.com/abhijeet.singh)

📄 PROFESSIONAL SUMMARY

Java Backend Developer with 4.5+ years of experience across telecom and tax-technology domains. At Rakuten Symphony, built Java microservices and Kafka/Spark-based pipelines running on Kubernetes infrastructure for real-time network performance monitoring and incident alerting. Currently at Infosys, developing Spring Boot/IBM DB2 backend modules for the Income Tax Department's AO Portal, with RedHat-based CI/CD and AI-assisted tools (GitHub Copilot, Claude Code). Strong fundamentals in REST APIs and Microservices. Looking to bring this backend depth and ownership to a product engineering team.

🧠 TECHNICAL SKILLS

Programming Languages: Java, SQL

Frameworks & Technologies: Spring Boot, Spring MVC, Hibernate/JPA, REST APIs, Microservices

Databases: IBM DB2, MySQL, Apache Cassandra

Big Data & Messaging: Apache Spark(Batch & Streaming), Apache Kafka

Cloud & DevOps: RedHat (RHEL / OpenShift CI-CD pipelines), Docker, Kubernetes, Jenkins, Artifactory

Build & Version Control Tools: Maven, Git, GitHub

Testing & Quality: JUnit, Postman, SonarQube

AI-Assisted Engineering: GitHub Copilot, Claude Code

Project Management: Jira, Confluence, ALM (Application Lifecycle Management)

📁 PROFESSIONAL EXPERIENCE

Senior Associate Consultant, Infosys Ltd.

Noida, India | 11/2025 – Present

Project: TDS CPC – AO Portal, Income Tax Department (Govt. of India)

Tech Stack: Java, Spring Boot, REST APIs, Microservices, IBM DB2, Kafka, RedHat

- Building REST APIs and Spring Boot services with JPA/Hibernate against IBM DB2, writing reliable, well-tested query logic to handle high-volume taxpayer and financial records without data integrity issues.
- Using Apache Kafka as a message queue between backend services on the AO Portal, enabling reliable, asynchronous communication across modules.
- Translating complex, frequently-changing taxation rules and functional requirements into clean, maintainable backend logic and production-ready features.
- Building and deploying backend services through RedHat based CI/CD pipelines, ensuring consistent, stable, and repeatable production releases across sprint cycles for a government-scale application.
- Leveraging GitHub Copilot and Claude Code throughout the development cycle to accelerate feature delivery, speed up debugging, and improve overall code quality and consistency.
- Ensuring release stability through JUnit test coverage, structured peer code reviews, and close day-to-day collaboration with QA and DevOps teams during every release cycle.

Software Engineer, Rakuten Symphony India Pvt. Ltd.

Bengaluru, India | 10/2021 – 10/2025

Projects: Performance Monitor (Telecom OSS – Network Performance & Incident Management)

Tech Stack: Java, Spring Boot, Apache Spark, Kafka, MySQL, Cassandra, Kubernetes

- Owned the incident and alarm module within the Performance Monitor platform, handling real-time detection, correlation, and alerting for network faults and device degradation across the telecom network.
- Developed backend logic for a Performance Incident Management system using configurable correlation rules that proactively detect and flag degraded network devices before they impact customers.
- Built a real-time alerting and notification service for network faults and alarms, including cell-down events, enabling operations teams to respond faster to critical network incidents.
- Diagnosed and resolved production issues within the incident/alarm pipeline, improving the reliability, accuracy, and timeliness of critical alerts delivered across the platform.
- Processed and published KPI-based incident alerts to Kafka for consumption by downstream monitoring, ticketing, and notification systems across the broader OSS platform.
- Built the underlying Java service that runs on Kubernetes based infrastructure, supporting a scalable, resilient architecture for continuous telecom network monitoring.

🎓 EDUCATION

Bachelor Of Engineering (Computer Science & Engineering)

Bhopal, India | 2016 – 2020

IES College of Technology
